

LAS VEGAS, Nevada, October 15, 2007/ EarthPreserver, LLC (Earthpreserver.com) announced today the startup of a program that will significantly boost participation of governmental entities and their employees in the fight to minimize the use of fossil fuels worldwide. The program, "EarthPreserver Public Partnership Program" or "EP4" aims to entice cities into the movement by trading out gas guzzling everyday use vehicles for more efficient vehicles at EarthPreserver expense.

David Brown, Managing Partner of EarthPreserver, LLC said " Involving the cities and their employees in our EP4 program can have a huge impact on the movement to reduce the use of fossil fuels, thereby slowing the rate of human caused global warming". " At Earthpreserver.com, we are committed to preserving the planet for future generations".

When asked for more details on how the program works, Mr. Brown said "Many cities use automobiles for department supervisors and others which are plainly too big and too wasteful of fuel for the job they do" he continued " We will enter into a partnership with these cities whereby we will purchase a fuel efficient vehicle that will replace the older and larger vehicle". "The tradeoff is that the cities will join us in asking that all employees of the city begin to find ways to minimize their personal impact on the environment and that the cities will also make that effort". Many things that can be done by individuals to lessen their "carbon footprint" can be found at www.EarthPreserver.com.

EarthPreserver.com provides "Verified Carbon Offsets" for individuals worldwide. Carbon offsets are purchased by individuals who want to assure that they are living a Carbon Neutral life. For information on the program, which is slated for startup in April of 2008, contact Mr.Brown through the EarthPreserver website: www.earthpreserver.com.

Created by EarthPreserver.com, the EarthPreserver Public Partnership Project, (EP4) strives to entice Cities and other Governmental entities and their employees to drastically cut their emissions or, in the alternative, at least balance their emissions through carbon offsets by becoming EarthPreservers.

CUTTING EMISSIONS: This enticement is in the form of EarthPreserver grants that will be used to purchase low carbon output vehicles to replace older gas guzzling vehicles for the Governmental entity. Imagine the difference it would make if your City just replaced official cars used in City Government to drive around town with low carbon output vehicles.

CITY BALANCE: This part of the EP4 allows Governmental Agencies to purchase carbon offsets through EarthPreserver.com at a discounted rate, as long as the entity makes the purchase part of its annual budget. There are Cities across the country that are already doing this, and we can help your local or State government do this as well.

IF YOU ARE A DECISION MAKER

...With your city, county, township, State, etc. and wish to find out more about the benefits of our EP4 program, please click on "contact us" and send us your contact information including Name, Position, Governmental Entity name, phone number, and e-mail. We will be glad to forward information to you regarding this innovative program and help you, your employees and your citizens become EarthPreservers.

IF YOU ARE A DECISION MAKER

With your business and wish to find out more about the benefits of partnering with us to make your company "an EarthPreserver" click on "contact us" and send us your Name, Position, Company name, location, your phone number and email. We will get back to you ASAP.
